

## Week 2: Pixel Art

This week you'll get to show us some creativity through pixel art! What is pixel art? Well, take a look at this [link](#) to get an idea!

Your task is to create something, anything out of pixels! Unfortunately, the current state of things look like this...

## Tasks

- Make the boxes into a more reasonable size to work with or keep it as it is!
- Create some pixel art
- Don't forget to create new classes / ids to create new colors

## Extra Tasks

- Try changing the shape of the box into another shape
- Add background colors to the boxes
- Make it animate when you hover over the boxes
- Create more pixel art!

## Submission

Upload your code to GitHub and let me know it's done via slack!

## Extra Extra Assignment

If you're done and you want another assignment. Try this [college level CSS assignment!](#) You'll need to use bootstrap in order to create the layout. Well, you don't have to, but it's probably wise that you use it :). It'll make life a lot easier!
